

THE AMAZING STORY OF DR. GIANNI DOTTO

The incredible story of
a now vanished
scientist whose work
covered topics such
as:-

The DNA Helix,
Age Retardation,
Magnetic Fields,
Cancer Research,
& Anti-Gravity

BY JOHN WEST
RESEARCH SCIENTIST

One of the most amazing stories, and least known, concerns an incredible genius named Dr. Gianni Dotto. His academic qualifications included a Ph.D in both nuclear physics and nuclear engineering, plus a degree in electrical engineering obtained from Wayne University in Detroit. He was a prolific inventor and owned many Italian and U.S. patents.

He was at one time, a principal of Alfa Romeo working on ways to improve the design. Also a trained pilot before the advent of World War II, he eventually joined the U.S. Air Force, after emigrating to America. Certainly in time to fly sorties against the Japanese just before their collapse.

It's interesting to note that Dotto's father was an Italian Marquis, and that the family was descended from Galileo. Gianni would have inherited the title of course if he had not gone to the United States.

However, be that as it may, he started working on several projects within his field in America. He started to take an interest in Biophysics and how magnetic fields affected the human body. In fact when he was working on a project at Milan University he first noticed that magnetic fields induced by an electric coil or by a permanent magnet appeared to have noticeable effects on body cells.

More importantly, later on he observed that superior magnetic fields generated by hot and cold areas had even greater effects on the human body.

As time went by, he started to experiment with devices which eventually became known as Dotto Rings and soon built machines which exhibited the Thermo-Magnetic Effect.

THERMO-MAGNETICS

- THE DOTTO RING DEVICE

Basically, this machine contained a ring of pure heavy copper approx 27 inches in diameter, having adjacent super-heated and super-cold areas, separated by a small gap adjustable by a threaded screw, made of a material substantially lower in thermal conductivity than copper, and used for 'fine tuning' purposes.

This in a nutshell was the very essence and heart of the device. To explain the nuclear physics behind the machine in this short article would not be possible. And for the average reader such explanations would mean little. Suffice to say all of the scientific rationale behind the Dotto Ring was enumerated by Dr. Dotto in his research papers.

THE HUNZA LINK

Amazingly, what Dotto had achieved was the reproduction, in a compact form, of the same Thermo-Magnetic environment which he believed was responsible for the good health of the legendary Hunza tribes living high up in the Himalayan Mountains. Most people would have heard of this tribe and

their amazing longevity.

Dotto spent much time living in his environment trying to figure out the answers which have, and still do, puzzle many scientists.

Eventually he found the answer! And it is this observation which placed him in a unique class. Seeing what everyone else had seen, but thinking what no one else had thought! One of the classic trademarks of the true genius.

He noted all the parameters of the Hunza tribes, their diets, their environment, their lifestyles, etc, but still he was not satisfied. He saw other tribes living in similar environments, but without the Hunza's incredible health.

After much contemplation and study, Dotto eventually came to an astonishing conclusion!

At the head of the great Hunza valley there is a massive glacial ice mass, but the valley itself heats up and becomes quite warm, thus creating the special conditions which Dotto knew so well, to produce the type of mild Thermo-Magnetic field which the Hunza tribes unknowingly exposed themselves to as they often travelled through this valley!

This remarkable observation, in a flash, told Dotto that he was correct in his whole Ring theory, here reproduced high up in the beautiful Hunza valley, by nature! It was demonstrating his research, as he well knew he looked at these beautiful people, many still very active and working on their crops at ages which defied belief. He found no signs of serious disease, particularly cancer. Dotto well knew why! More of that later.

DNA & THE DOTTO RING

In order for the reader to understand how the Thermo-Magnetic Effect produced by the Dotto Ring works a short basic explanation of the inter-relationship of DNA and this special magnetic field is required. I will make it as painless as possible!

The nucleus of each human cell contains DNA (deoxyribonucleic acid) which contains the genetic code. Under the powerful magnification of the electron microscope, DNA looks like a twisted ladder known as a double helix. It vibrates in resonance with many influences, both internal and external, and is polarised, one end plus, the opposite end minus. Healthy DNA ensures healthy cells which helps the body maintain its defences against disease.

One of the strengths of the DNA is the base pairs per turn of the DNA spiral, like the steps of a ladder. As the aging process starts, these base pairs per turn gradually decrease, thereby 'weakening' the structure of the whole DNA helix. The hydrogen atom bonding becomes less efficient. Its resonant vibrational frequency rate starts to decay. Eventually the DNA stops reproducing itself. The aging process now makes its presence felt.

THE AGING PROCESS AND THE DOTTO RING

The DNA helix ladder is approx 39" long, composed of 6 billion steps. Each step has the form of two capital T's facing each other. The DNA is constructed by 12 billion nucleotides, or bases, which face each other to make the double helix. Everyone of the 6.3 trillion cells of the body has at least one.

These bases are very important. Sufficient must have to be present for the DNA to keep reproducing itself. For it so happens that one of the main aging factors is directly connected to the amount of base pairs per turn of the DNA helix.

When the body is subjected to the influence of the Thermo-Magnetic Fields of the Dotto Ring, polarisation of the DNA helix is once again correctly phased. Its natural resonance is increased. Its base pairs per turn (the steps of the ladder) are also again increased.

Think of it like a child's large top. When it is first spun, it is in perfect harmony, perfect balance. Slowly as the energy decays it starts to wobble and eventually becomes unbalanced and falls over.

So with the DNA. When the baby is born the DNA is in harmony, in balance. As the child grows into adulthood it remains so, but as the aging process begins to bite later in life, the "ladder" starts to lose some of its 'strength'.

In particular, it goes something like this.

The DNA of the embryo cell in the womb has 46 base pairs per turn. At 6 weeks of pregnancy the base pairs are reduced to 34 in number. At two years of age the child has 22 base pairs per turn. 14 at age 21. 10 at age 35. It then stabilises until about age 50-55. After then the base pairs per turn are now down to 6! The top analogy now makes its presence felt! For it is at this time the lines and wrinkles start to show with ever increasing tempo!

Returning to Dr. Dotto's remarkable research, could this special type of magnetic energy generated by his rings have a noticeable effect upon this aging process? More importantly - upon the disease process?

DOTTO PROCLAIMED THAT THERE ARE THREE MAIN WAYS OF MANIPULATING THE DNA.

1.) Establishing ways of re-stretching the DNA to increase base pairs per turn.

Basically, he suggested that by triggering back the base pairs per turn of the DNA helix to 10 from 6 via ring treatment given every 14 days, the system would remain stable at the figure of 10. Among other benefits, the result would be a slowing of the aging process.

2.) Re-establishing the kinetic energy of the DNA helix. (Vibrational Rate)

3.) Increasing the energy of the charged ions in the nervous system by attention to diet and lifestyle.

ARE THERMO-MAGNETICS THE ANSWER?

After many years of research Dotto at last proclaimed that he now firmly believed that by subjecting the body to regular treatments of Thermo-Magnetic energy via the ring machines, it would be possible to, re-energise if you like, the DNA helix! Further, that many serious diseases like cancer for example, could be radically influenced in a positive manner!

Basically, he suggested that by triggering back the base pairs per turn of the DNA helix to 10 from 6 via ring treatment given every 14 days, the system would remain stable at the figure of 10. Among other benefits, the result would be a slowing of the aging process.

Certainly an astounding conclusion from an equally astounding research program.

THE DOTTO RING AND DISEASE

Three years of testing in the 1967-1971 period were carried out at the Dotto Foundation Complex, utilising small animals.

[57] **ABSTRACT**

A method for constructing a thermionic couple comprising an apparatus in the form of a ring or loop of metal such as copper having high electrical and thermal conductivity. The ring has spaced ends forming a gap joined by a bridge member formed of material having significantly lower electrical and thermal conductivity than the ring. A substantial thermal unbalance is induced between the junctions of the ring and the bridge member. The width of the gap and the effective length of the bridge member is adjusted to produce a recurrent cyclic thermoelectric unbalance, resulting in repeated changes in the energy level of the metal atoms of the ring.

1 Claim, 2 Drawing Figures

Primary Examiner—W. Tupman
Attorney, Agent, or Firm—Woodard, Weikart, Emhardt & Naughton

Professor Gerald L. Willis, Biology Professor at the University of Dayton in the USA, and a Dr. Zipf who performed pathology on the test mice, conducted rigidly controlled experiments. Other scientists were not allowed near the complex. Strict secrecy was maintained.

In one of many experiments, mice were infected with S37 & Krib cancer cells. The controls, untreated mice, all died within 7 days. The mice treated with the Dotto Ring Machine, with one or two exceptions, all survived. When these mice were finally sacrificed, they showed no clinical signs of cancer! No side-effects were observed.

Dr. Dotto eventually built 2 large commercial machines and set them up in his Bio-Physics Lab in Kettering, Ohio. During five years, many experiments were undertaken. Conclusions: Susceptible small animals injected with appropriate cancer cell strains and then treated with the Dotto Ring Machine, did not develop cancer!

The Dotto Ring device, for the purist academic, employ what is known in physics, as the Thompson & Peltier Effects, which combine to produce the Seebeck effect, or Thermionic Couple. All of the scientific rationale behind the whole concept is, as I stated earlier, contained in the research papers of Dr. Dotto. I was very lucky to obtain a copy of the full research papers some three years ago, including detailed plans to be able to construct such a machine.

It's very interesting to note that in experiments carried out when operating the rings, a pale blue white "halo" appears around them! Which corresponds to that of Orgone Energy,

described by Dr. Wilhelm Reich, in the twenties and thirties during his research. Dr. James DeMeo has very recently released a book on Orgone Energy, called *The Orgone Accumulator Handbook*, detailing Reich's work. This book is obtainable from Veritas Press - see advert on page 65)

So what happened to Dr. Dotto and his incredible machines?

According to my research from a reliable source, Dotto was being watched very closely by several American "agencies".

LEVITATION OF THE RINGS!

You see, apparently the big problem with Dotto's work was not so much due to its therapeutic or anti-aging effects, but that the rings in their free state when energised had a tendency to rise up off the floor!

This corresponds to Dotto's own theory of a thermo-magnetic field being responsible for the general gravitational system!

Even more amazing, it was said internal security agencies believed that Dotto had accidentally stumbled upon the propulsion system of UFOs!

THE RING EFFECT AND GRAVITATIONAL LAWS

If Dotto is correct regarding the Thermo-Magnetic Effect being responsible for the general gravitational system, then Newton's Laws of Gravitational Attraction will require quite considerable re-appraisal. Perhaps it was Dotto's belief and work in his special field which made him a target for the American security agencies. Such 'heretical' beliefs in alterna-

tive scientific solutions which fly in the face of 'well-founded' and 'proven' science could cause chaos if allowed to blossom.

Actually it's quite interesting to speculate that Dotto's 'new' gravitational laws could explain some of the unanswerable questions which face physicists today, not the least of which would be the enigmatic Black Holes of space.

The intense energy release of a rapidly collapsing Neutron Star would generate enormous heat, contrasting with the extreme cold of deep space to produce the 'thermal imbalance' necessary to create fantastic gravitational fields, blocking all light escape.

Dotto also believed that this same "thermal imbalance" was implicated in the Sun's gravity waves and our 'cold' planets.

THE G.U.T.

Further, and perhaps more importantly, what Dotto had REALLY discovered may have been the true Grand Unified Field, searched for by scientist, including Einstein, for many decades. The G.U.T., or Grand Unified Field Theory, basically converges electromagnetism, gravity and nuclear forces into one single 'Super Force'.

When this occurs, according to theory, an astonishing effect emerges - ANTI-GRAVITY!

Which in a way brings us back to the Dotto Ring and its reported tendency to rise up off the ground!

If indeed Dotto had made an incredible breakthrough in Quantum Mechanics, then he would have been too far ahead of his time, and like many geniuses down through history who have 'rocked the boat' of dogmatic science, was simply 'eliminated'.

It seems in Dotto's case that he and his machines disappeared!

In this context it was rumoured that a U.S. electronics expert with a great interest in the Dotto Ring, somehow got hold of a copy of the plans to build the machine. Whether he did is not known, but apparently he too disappeared!

A retired scientist versed in nuclear physics, who is a friend of mine that can be trusted, recently looked over the whole Dotto research papers. After a couple of weeks he contacted me. He said, quote: "Apart from some minor disagreement I can find no logical reasons why, at least theoretically, Dotto's research isn't sound. Frankly, I am in some awe at the outcome of his research. It would appear, again theoretically, that he made a most profound discovery in the field of Quantum Mechanics. However it would be a brave scientist indeed who would contemplate putting together such a device" (Dotto Ring Machine). Anyone with basic skills in electrical and mechanical engineering could construct a Dotto Ring device. Cost, about \$4000.

Why haven't I? Well, if I did and it produced all the effects Dotto claimed, it would still represent a profound breakthrough in science, and the ramifications for me, at the scientific and political levels, simply could not be ascertained. After all how could one suppress such a major discovery?

All of the Dotto research and construction plans lie in a safe deposit box. They will, unfortunately, possibly stay there for good. Such is the power of the money barons who control our lives, new discoveries have to wait their time. I for one am not prepared to buck the system and have to endure whatever form of hell that may go with it!
